

## Add Web Site Access in Course

As an instructor, you might like to provide access to an outside website to assist with your students' ability to find useful information. The instructions below explain how to add a website into your course. Examples of websites that might be helpful to include are: Wikipedia, Dictionary.com, Reference.com.

### CREATE NEW ITEM

- † Click the **Author** tab.
- † Click **Course Home**.
- † Click the **Course Items** button (see illustration below left).  
or
- † Click the **Week** where the **Content Item** is to be added.
- † Click the **Week Content Item** button (see illustration below right).

- † Click the **Add Items** button.
- † The **Course Items** window will display.
- † Click the **Add Items** button (see illustration below).

- † The **Add Items** window will display (see illustration below).

**Add Items**

Name:\*  - OR -

Item type:\*

Add to:   
Week 1: Week 1  
Week 2: Week 2  
Week 3: Week 3  
Week 4: Week 4

Assign to:

Hide item from students  
 Create dropbox basket

Grading:  Add to Gradebook  
 Points  
 Exclude from Grade  
 Extra Credit  
Gradebook weighting is turned on. If you want to assign weighted percentages go to the Assign Points/Weights tab under Setup Gradebook.

\* Indicates a required field

- † Input a name for the item into the **Name** box.

- † In the **Item Type** list, select **Text/Multimedia**.
- † Click the **Add Items** button.
- † Select whether or not to create a Dropbox for the item.
- † Select the options under **Grading** if this is to be a gradable item.
- † In the **Navigation Pane**, click the newly created item.

#### ADD WEB SITE ACCESS

- † At the bottom of the new page, go to the HTML mode (see illustration below). This appears at the bottom of the Visual Editor window.
- † Copy the code in the first bullet into the **HTML** window.
  - ☆ `<iframe src="http://www.websitehere.com" width="100%" height="300">`
  - ☆ This will provide the iframe structure you need.
  - ☆ If your computer browser does not support iframes, input the slash as shown here `</iframe>`
- † Swap out the website in the code (above), with the website you want embedded into your course.
- † Click the **Save Changes** button.
- † Click on the **Course Tab** and see how the embedded website looks on the page.
