

Insert YouTube Video into eCollege Content

When working in eCollege, it is a simple process to add a YouTube video to a Text/Multimedia Content Item. When the video is added it will appear in the specified Content Item. Students can then click on the video to view it.

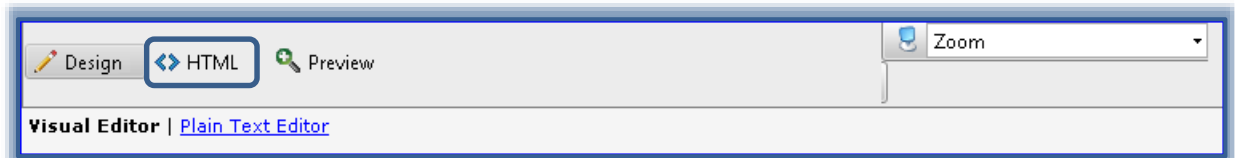

Access the Video in YouTube

- ✓ Locate the video on **YouTube** that you want to use.
- ✓ Click the **Share** button below the video.
- ✓ Click the **Embed** button.
- ✓ Copy the **Embed Code** (see illustration).

Load the Video in eCollege

- ✓ Create a **Text/Multimedia Content Item** in eCollege.
- ✓ Once the item is created, click the **HTML** link at the bottom of the text box (see illustration below).

- ✓ Paste the **Embed Code** into the **HTML** area.
- ✓ Click the **Design** button.
- ✓ The **You Tube** video will appear in the **Content Area**.
- ✓ Add any other content that needs to be added.
- ✓ Save the changes.

NOTE: You can also add a link to the YouTube video instead of embedding it into the Content Area. Just copy the code in the first text box and use that address when creating the link.
