

CREATE OBJECTS INTRODUCTION

Objects can be added to a SMART Notebook page, including freehand objects, shapes, lines, text, and graphics. The SMART Notebook Toolbar buttons that are used to create these objects can be found in the **Notebook Toolbar** document on the **SMART Board** page of the **Training Web Site**. In the SMART Notebook, it is possible to:

- † Write or draw freehand objects using the Pen, Crayon, Calligraphic, and Creative Pen Tools.
- † Add shapes, such as rectangles and circles, using the Shape tool.
- † Draw shapes using the Shape Recognition tool.
- † Insert Math equations using the Math Equation Editor.
- † Insert regular polygons.
- † Add typed text using the Text tool.
- † Convert handwritten text to typed text.
- † Insert graphics files or scanned images.
- † Insert images from a SMART Document Camera.
- † Insert Adobe Flash files.
- † Insert Adobe Flash video files.
- † Add a link to an object.
- † Add a sound file to an object.
- † Animate objects.

NOTE: It is also possible to create freehand objects that slowly fade using the Magic Pen Tool.
