

USE SMART NOTEBOOK SHAPE RECOGNITION

This option is used to draw circles, ovals, squares, rectangles, triangles, and arcs on a Notebook page. If the SMART Notebook recognizes the drawing as one of the shapes, it adds the shape to the page. For example, if the shape is recognized as a triangle, the triangle will be placed on the page (see illustration below).

- ✚ To create an object with the **Shape Recognition** tool:
 - ✦ Click or press the **Pens** icon on the **SMART Notebook Toolbar**.
 - ✦ The **Pens Panel** will display (see illustration below).

- ✦ Press or click the **Pen Types** button.
- ✦ A list of different pen types will display.
- ✦ Select **Shape Recognition Pen**.
- ✦ The **Shapes Panel** shown below will display.

- ✚ Do one of the following:
 - ✦ Press lightly with your finger and drag to create the shape on the SMART Board.
 - ✦ Click the left mouse button and drag it to create the shape. This option can be used if the work is being done on the computer workstation rather than on the SMART Board.
- ✚ To discontinue using the **Shape Recognition** tool, click the **Select** button (see illustration at right) on the toolbar.
- ✚ Click or press the image to select it.
- ✚ The **Shape Properties Contextual Panel** will display (see illustration below).

- ✚ Make the changes to the image by clicking on the three options in this panel.
 - ✦ **Color** - This button can be used to change the fill color and the line color for the shape.
 - ✦ **Line Style** - Use this button to change the line thickness and style.
 - ✦ **Transparency** - To make the shape transparent, use this button.
