

SMART NOTEBOOK WINDOW

This window provides a number of ways to look at and interact with a notebook file. The table below provides a list and description of the different components of this window.

Component	Description
Add-ons	Add-ons are extensions to SMART Notebook software. These add-ons are created by SMART Technologies and by third-party software developers. Two add-ons included for the SMART Notebook are the Activity Builder and the Alignment Tools. Other add-ons can be installed from the SMART Exchange.
Attachments	The Attachment tab is used to attach a copy of a file, a shortcut to a file, or a Web page link to a file.
Gallery	This area contains clip art, backgrounds, notebook files and pages that can be used in a presentation. Thumbnails in the Gallery show previews of gallery content images. It also provides access to other online resources.
Page Sorter	Thumbnails of the pages in the current file will be displayed in this area. This area is used to organize pages and move objects from page to page. Any page can be viewed by pressing its thumbnail in the Page Sorter.
Properties	Use this tab to change the options for the currently selected object. If a shape is selected, for example, the Properties tab will display options for fill effects, line styles, and object animation.

Component	Description
SMART Notebook Toolbar	This toolbar is used to select and use a variety of commands and tools. A list and description of each of the tools on this toolbar are listed in the SMART Notebook Toolbar Button document.
Whiteboard Area	This area displays the current page and makes it possible to create, edit, and manipulate objects.
