

Guide to Functions of Control Panel

The illustration below shows the Control Panel of the machine with the options fully installed. The table explains each of these components.

The numbers in the column on the left correspond with the numbers in the illustration. When a number appears twice, it means there are two functions available with the same number.

Component	Function
1 Display Panel	This panel displays keys for each function, operation status, or message. This is a touch panel. Just press each of the keys to specify the function that is to be performed.
2 Main Power Indicator	This indicator will activate when the Main Power Switch is turned on.
3 Status Indicator	This indicator shows the status of the system. The light stays lit when there is an error or when the toner needs to be changed.
4 Data Inn Indicator	The light flashes when the machine is receiving a print job.
5 Fax Indicator	This light will flash during data transmission and reception. It stays lit when a confidential fax is being received.
6 Media Slots	Use these slots to insert an SD Card or USB Flash Memory Device into the machine.
7 Media Access Lamp	This lamp will light up when an SD Card is inserted into the Media Slot.
