

SoftChalk-Supported Web Browsers

SoftChalk supports Internet Explorer and Firefox on the Windows environment and Firefox and Safari on the Macintosh computers. Internet Explorer 7 is not supported. Internet Explorer 8 or higher is supported. Firefox 10 or higher is required to view the lessons created in this program.

SoftChalk **does not** support **Google Chrome**. This is because Chrome has a **problem** with **JavaScript** which is the technology that SoftChalk uses to handle QuizPoppers and Quiz Groups. This means that QuizPoppers and Quiz Groups do not work properly with Chrome.

To access a detailed listing of the supported system specifications for using SoftChalk go to the [System Specifications](#) page of the SoftChalk Web Site.

SoftChalk supports the viewing of content on most Smart Phones and Tablets. An “App” is not required to view the content. SoftChalk can be viewed on the available Web browsers of most mobile-devices. Content has been tested with iPads, iPhones, and Smart Phones/Tablets running Android 2 or higher.
