

SoftChalk-TextPopper

TextPoppers are text annotations that display when the user moves the mouse pointer over a text or an image. This feature can be used to provide additional information about the selected text or to explain the image that the TextPopper is applied to. These items can only be seen when the lesson is being displayed in the Web browser window. When in the Web browser, move the mouse over the object to display the TextPopper.

CREATE TEXTPOPPER

- ☰ Select the text or image that the TextPopper is to be created for.
- ☰ Do one of the following:
 - ☞ Click **Insert** on the **Menu Bar** and then select **TextPopper** from the list of features.
 - ☞ Right-click the text for which the **TextPopper** is to be created and then select **TextPopper**.
 - ☞ Right-click the edge of the image and then select **Insert TextPopper**.
- ☰ The **TextPopper** window will display (see illustration below).

- ☰ Input or paste text into the **Top Area** and the **Bottom Area**.
- ☰ Right-click in the **Areas** to add an image, hyperlink, media, or equation to the **TextPopper**.
- ☰ Under **Background Style** select a style for the **TextPopper** (see illustration above right).
- ☰ In the **Features** area, select the options for how the **TextPopper** will appear when the mouse pointer is moved over the text.
 - ☞ Selecting the **Stickaround** feature insures that the **TextPopper** will stay on the screen until the lesson is closed.

☞ If this feature is not selected, the **TextPopper** will disappear each time the cursor is moved away from the text.

☞ When all the features have been selected, click the **OK** button.

☞ The annotated text will appear in **Bold** formatting and in the color of the **Lesson Style**.

MODIFY TEXTPOPPER

To modify the **TextPopper** do of the following:

☞ Right-click the image or text where the TextPopper was inserted and select **Modify TextPopper**.

☞ Click in the area where the TextPopper was inserted, click **Insert**, and then select **TextPopper**.

REMOVE TEXTPOPPER

To remove the **TextPopper** do one of the following:

☞ Right-click the image or text where the TextPopper was inserted and then select **Remove TextPopper**. In the **TextPopper** window, select **Remove**.

☞ Click the area where the TextPopper was inserted, click the **Insert** tab and then select **TextPopper**. In the **TextPopper** window, select **Remove**.
