

SoftChalk-Tools Menu

To check the spelling for the lesson or to display the HTML code, select this menu item. It is also possible to make changes to the Style for the lesson setup using this menu.

File Edit Insert Format Tools Table Properties Preview Web Help

Menu Item	Description
Check Spelling	This feature is used to check the spelling in a lesson. The Check Spelling dialog box will display when the feature is selected. A list of possible correct spellings will display. You will be able to Ignore or Replace the highlighted word with the suggested word.
HTML Source	Select this feature to display the source code that is used in the background to write the lesson. The HTML Source window will display.
Enable Auto-Recovery	This feature provides additional safe guards for saving your lessons. This helps to prevent data loss during extraordinary circumstances such as power shortages. This feature is turned on by default. Remove the check mark for this feature to turn it off.
Include Mobile Pages	To allow the lesson to be formatted for mobile devices, select this feature. This feature is turned on by default. Remove the check mark for this feature to turn it off.
ReadSpeaker	This is an add-on feature to SoftChalk that can be purchased from the ReadSpeaker Web site. ReadSpeaker is a program that reads the lesson for the students. This feature can be activated when the user purchases an account.
Style Builder	To create your own style for a lesson or to import a style that has been created for Siena, select this feature. When this feature is selected, the eCollege StyleBuilder window will display. Changes can be made to this style, if desired.
eCourse Builder	This feature is used to assemble a course with multiple lessons. It is only recommended for more advanced users of SoftChalk.
Media Search	To search for content across several content repositories, such as Flickr or YouTube, select this feature. The Media Search window will display when this feature is selected. A list of different searchable content repositories is available to search from.
Library	This feature allows you to save Images, Media, QuizPoppers, Equations, Quiz Groups, and Activities to a central repository. The saved elements can then be re-used in the same lesson or in a different lesson.
