The Start Menu is the central link to the computer’s programs, management tools, and file storage structure. The Start Menu can be opened by clicking the Start Button (see illustration at right) on the far left end of the Taskbar or by pressing the Windows icon at the left of the spacebar. Some of the items described in the table may have been turned off when Windows 7 was installed on the computers.

</table>

**Customize the Start Menu**

It is possible to add or remove items that appear on the right side of the Start Menu, such as Computer, Control Panel, and Pictures. Items that appear as links or menus can also be changed.
**Pin Items to the Start Menu**

One of the ways to create shortcuts to frequently used programs is to pin them to the Start menu. To do this:

- Click **Start** on the **Taskbar** (see illustration at right).
- The **Start Menu** will appear (see illustration below).

- Click **All Programs** in the **Start Menu**.
- A list of programs will display on the **left side** of the **Start Menu**.
- Click the **Microsoft Office** folder.
- A list of **Microsoft Office** programs will display.
- Right-click on any program in the **Microsoft Office** list such as **Word** or **Excel**.
- Choose **Pin to Start Menu** from the shortcut menu list that appears.
- The item will appear above the line on the left-hand side of the **Start Menu**.

**NOTE:** Other programs can also be pinned to the Start Menu by selecting that program from the All Programs list.

**Remove Pinned Items from the Start Menu**

- Click **Start** on the **Taskbar** (see illustration at right).
- Right-click on the program icon for the program that is to be removed.
- Choose **Unpin from Start menu**.
Move the Start Button and Taskbar
The Start button is located on the Taskbar. Although it is not possible to remove the Start button from the Taskbar, it is possible to move the Start button along with the Taskbar to a different location.

- Right-click an empty space on the Taskbar.
- A shortcut menu of commands will appear (see illustration below).

- Click the Lock the Taskbar link to remove the check mark.
- Click an empty space on the Taskbar.
- Hold down the mouse button.
- Drag the Taskbar to one of the four edges of the desktop.
- When the Taskbar is in the desired location, release the mouse button.
- Right-click the Taskbar and then click Lock the Taskbar.
- Locking the Taskbar prevents it from being moved or resized accidentally.

Add Recent Items to Start Menu
- Right-click the Start button on the Taskbar (see illustration at right).
- Choose Properties from the list of options
- The Taskbar and Start Menu Properties dialog box will display (see illustration on next page).
- Make sure that the Start Menu tab is selected.
- Click the Store and Display Recently Opened Items in the Start Menu and Taskbar check box under Privacy.
- Click the Customize button.
- The Customize Start Menu dialog box will appear (see illustration on next page).
- Scroll through the list of options to locate the Recent Items check box.
- Click the check box for Recent Items.
- Click OK twice to exit both dialog boxes.

Clear Recently Opened Files or Programs from Start Menu
When a file or program is cleared from the Start menu it is not deleted from the computer.

- Right-click the Start button on the Taskbar.
- Choose Properties from the list of options.
- Make sure that the Start Menu tab is selected.
- Click the Store and Display Recently Opened Items in the Start Menu and the Taskbar check box to remove the check mark.
Adjust Number of Shortcuts for Frequently Used Programs

Right-click the Start button on the Taskbar.

Choose Properties from the list of options.

The Taskbar and Start Menu Properties dialog box will display (see illustration above left).

Make sure that the Start Menu tab is selected.

Click the Customize button.

The Customize Start Menu dialog box will appear (see illustration above right).

In the Number of Recent Programs to Display box, enter the number of programs to display on the Start Menu.

Click OK twice to close both dialog boxes.
Customize Right Pane of Start Menu
It is possible to add or remove items that appear on the right side of the Start menu, such as Computer, Control Panel, and Pictures. Some items on the Start menu can be changed so that they appear as links or menus.
- Right-click the Start button on the Taskbar.
- Choose Properties from the list of options.
- The Taskbar and Start Menu Properties dialog box will display.
- Make sure that the Start Menu tab is selected.
- Click the Customize button.
- The Customize Start Menu dialog box will appear.
- Select the Options in the list that are to be changed.
- Click OK twice to exit both dialog boxes.

Restore Start Menu Default Settings
With Windows 7, it is possible to restore the Start Menu to the original default settings.
- Right-click the Start button on the Taskbar.
- Choose Properties from the list of options.
- The Taskbar and Start Menu Properties dialog box will display.
- Make sure that the Start Menu tab is selected.
- Click the Customize button.
- The Customize Start Menu dialog box will appear.
- Click the Use Default Settings button on the bottom left side of the dialog box.
- Click OK to exit the dialog box.
- Click OK again to exit the Properties window.

Search for Programs from Start Menu
With Windows 7, it is possible to search for documents or programs directly from the Start Menu.
- Click the Start Button (see illustration at right).
- In the Search box, input a word or phrase.
  - The Search box appears at the bottom of the Start Menu (see illustration below).
  - A list of items that match the Search will appear in the left frame of the Start Menu.

- Click the item in the left frame that matches the Search results.
- The item will open in the appropriate program.

Start a Program from the Start Menu
The real work to be performed in the Windows 7 environment starts with the software that can be run on the computer. There are several different ways that programs can be started. This section will describe the different ways that a program may be opened from the Start menu.
All Programs
✦ Click the Start button. This button is located in the lower left corner of the window (see illustration at right).
✦ Click the All Programs menu item. This option is located at the bottom of the Start Menu (see illustration below).

✦ A list of program folders will appear in the left pane.
✦ Click the folder, such as Microsoft Office, where the program is stored.
✦ Click the program that is to be opened.

Pinned Items List
✦ Click the Start button.
✦ In the Pinned Items List click the program that is to be opened.

Search
✦ Click the Start button.
✦ In the Search box, start inputting the name of the program that is to be opened (see illustration above).
✦ A list of items matching the word or phrase will appear in the left frame.
✦ Click the program that is to be opened.

Change Picture
With Windows 7, it is possible to choose a picture that is associated with your user account. It is shown on screens or menus that display your user name, such as the Welcome Screen and the Start Menu.
✦ Click the Start Menu button (see illustration at right).
✦ A picture will appear at the top right side of the Start Menu.
✦ Click the Picture.
✦ The Make changes to your user account window will display (see illustration below).

✦ Click the Change your picture link.
A gallery of pictures will appear (see illustration below).

† Click one of the pictures in the gallery.
† Click **Change Picture**.
  or
† Click the **Browse for more pictures** link.
† The **Open** window will display.
† Scroll to the area where the picture is located.
† Click the picture that is to be inserted.
† Click the **Open** button.
† The picture will be loaded.
† The user account window will display again with the picture displayed.
