

Visio-Design Tab

This tab is used to apply a design to the document in a Visio diagram. The table below provides a description of each of the buttons on this tab.

Groups/Buttons	Description
Page Setup Group	
Orientation	Click this button to set the page orientation between portrait (8.5 x 11) and landscape (11 x 8.5). When Auto Size is turned on, this will also set the printer page orientation.
Size	Select this option to change the paper size for the document. A list of different sizes will appear. Click the More Paper Sizes link at the bottom of the list to specify other paper options. When Auto Size is turned on, this will also set the printer paper size.
Auto Size	When this option is selected, the paper size will automatically change as the diagram is being completed.
Themes Group	
Themes	To apply a different design to the document, select one of the options from the Themes gallery. Click the arrows at the end of the gallery to display additional options. Right-click any of the designs to display additional options for applying the theme.
Variants Group	
Variants	This option can be used to customize the look of the current document. Click the arrows at the end of the gallery to apply additional customization such as color, effects, connectors, and embellishments to the document.
Backgrounds Group	
Backgrounds	To apply a background style to a document, select this option. A gallery of different backgrounds will display. Right-click any of the backgrounds to view additional options for applying the background. Click the Background Color link to change the color for the background.
Borders & Titles	This option can be used to apply borders and a title design to the page. Right-click the design to apply it to the current page or to all pages.
Layout Group	
Re-Layout Page	To re-layout the page by allowing Visio to reposition the shapes, select this option.
Connectors	Select this option to change the appearance of connectors in the diagram.
