

CUSTOM HTML - THIRD PARTY AUDIO OR VIDEO

This element is used to embed video or audio uploaded elsewhere. It is available with the Free Account as well as the Pro Version.

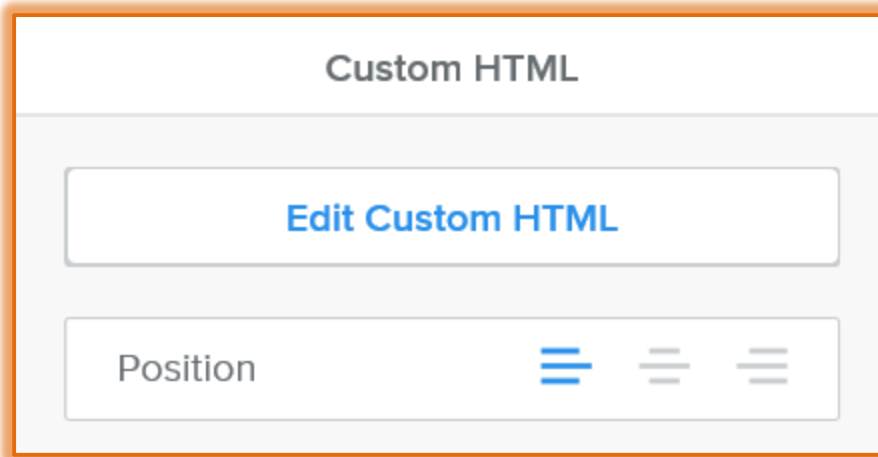

- ✦ Click the **Build** tab, if necessary.
- ✦ Click and drag the **Embed Code** element in the **Basic** group to the page where the **Audio** or **Video** file is to be embedded.

- ✦ The **Custom HTML** element will appear on the page.

Click to set custom HTML

- ✦ Locate the **Audio** or **Video** that is to be embedded into the Web page.
- ✦ Copy the **Embed Code** for the **Audio** or **Video**. The steps in YouTube are:
 - 🔒 Click the **Share** button.
 - 🔒 Click the **Embed** button.
 - 🔒 The **Embed Code** should be highlighted.
 - 🔒 Use the key combination **Ctrl + C** to copy the **Embed Code**.
- ✦ Once the **Embed Code** has been copied, select the **Click to set custom HTML**.
- ✦ The **Custom HTML Pane** will display above the element (see illustration below).

- ✦ Click the **Edit Custom HTML** link in the **Pane**, if necessary.
- ✦ Paste the **Embed Code** into the **Element**.
- ✦ Click away from the **Element**.
 - 🔒 The **Element** may not appear immediately. The original text may reappear.
 - 🔒 You can move to another page and then return to the video/audio page.
 - 🔒 The video or audio should then appear.

- ✦ To change the **Audio** or **Video** file, click the **Edit Custom HTML** link in the **Panel**.
- ✦ The new **Embed Code** can then be pasted into the **Element**.

NOTE: For **additional information** about inserting **Audio** and **Video** with **Custom HTML**, check out **Weebly Help**.
