

Divider and Spacer Elements

DIVIDER ELEMENT

Use this element to add emphasis to a page or to add a line divider between elements on a page.

- ✚ Drag the **Divider Element** from the **Structure** group onto the page.
- ✚ The **Divider Element** will appear on the page (see below).
- ✚ Click the arrow on the left side of the **Divider Element** to move it to a different page in the site.
- ✚ Click the arrow on the left side of the **Divider Element** to copy it and then paste it in a different location on the page.
- ✚ Click the **X** on the right side to **Delete** the element.
- ✚ Click the area in the middle to move the **Element** to a different location on the page.

SPACER ELEMENT

This element is used to add extra space to a Weebly page. It can be made as wide or as tall as needed. It can be inserted between columns of information or above or below an element.

- ✚ Drag the **Spacer Element** from the **Structure** group onto the page.

- ✚ The **Spacer Element** will appear on the page (see illustration above).
- ✚ Click and drag the blue bar at the bottom of the element to resize it.
- ✚ Click the arrow on the left side of the **Divider Element** to move it to a different location or page.
- ✚ Click the arrow on the left side of the **Divider Element** to copy it and then paste it in a different location on the page.
- ✚ Click the **X** on the right side to **Delete** the element.
- ✚ Click the area in the middle to move the **Element** to a different location on the page.
